

SHANMUGA SUNDARAM C

Chennai, TN | +91 87604 46766 | sundarcss6@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Software engineer experienced in building production-scale data collection and automation systems. Specialises in Python-based data pipelines, browser automation, API/network data extraction, MongoDB, cloud storage, and workflow orchestration. Experienced in designing multi-stage processing systems, concurrency, data quality and deduplication, monitoring, and adapting automation workflows to changing web environments. Background in full-stack development and machine learning.

SKILLS

Languages: Python, JavaScript, SQL, HTML, CSS

Data Engineering & Automation: Python data pipelines, browser automation, Chrome DevTools Protocol (CDP), Selenium, API/network data extraction, ETL pipeline design, workflow orchestration, concurrency and parallel processing

Databases & Cloud: MongoDB, MySQL, Google Cloud Storage

Web & Frameworks: React.js, Node.js, Express.js, REST APIs

Practices & Tools: Git/GitHub, Linux, SDLC, technical documentation

WORK EXPERIENCE

Junior software developer (09/2025 – Present)

Pinaca Technologies | Chennai, TN

- Design and maintain scalable Python-based data collection and processing pipelines for social media and news data.
- Develop browser automation and network-data extraction workflows, with multi-stage processing for collection, parsing, enrichment, validation, and storage.
- Work with MongoDB and cloud storage for structured data, media assets, job execution, and processing results.
- Implement parallel and concurrent processing, workflow orchestration, monitoring, logging, and error handling to improve pipeline reliability and efficiency.
- Troubleshoot high-volume data pipelines and create technical documentation covering architecture, data flows, deployment, and operational workflows.

Full Stack Developer Intern (01/2024 - 04/2024)

Aristotech Pvt Ltd | Chennai, TN

- Developed and maintained a full-featured CRM web application using React.js, Node.js, Express.js, and MongoDB, serving Admin, Employee, and Client modules.
- Implemented advanced CRUD operations and real-time validations to improve data accuracy and application reliability.
- Refactored backend REST APIs and frontend components to improve application performance and maintainability.

PROJECTS

House Rental System Application (MERN Stack) — React.js, Node.js, Express.js, MongoDB

- Built a full-stack house rental and buying platform with separate Buyer and Seller modules, advanced property search filters, dynamic listings and secure messaging.
- Deployed on Vercel and Render with an emphasis on scalability and performance.

Music Recommendation System (Machine Learning) — Python

- Built a music recommendation engine using Support Vector Machines to predict suggestions from genre, mood and listening patterns.

CERTIFICATIONS

- Developing Frontend Apps with React — IBM
- Developing Back-End Apps with Node.js and Express — IBM
- MongoDB Basics — MongoDB

EDUCATION

Master of Computer Application - University of Madras

CGPA: 7.5 | 2022 - 2024

B.Sc. Computer Science - A.V.C College, Mannampandal

CGPA: 8.42 | 2019 - 2022
